

GPMS: 10 years Anniversary!

GPMS
foundation ceremony
3.12.2001

Presently we are
witnessing the
projectification
of the world.

*... as a growing number of specialists organise their work in projects
rather than on on-going functional basis.
(Sergey Filippov, 2009)*

*Innovation is a
non-linear process.*

*It is the exploration and exploitation of new ideas and recombination of existing knowledge in the pursuit of sustained competitive advantage.
(Herman Mooi, 2009)*

IPM – **Innovation Project Management**

*IPM is the management of a systems that transforms inputs into outputs and has a feedback mechanism to ensure that the project output is consistent with ist objectives.
(Anbari, 2005)*

Projects transform **invention** to **innovation**

*Invention is the first occurrence of an idea for a new product or process, while
innovation is the first attempt to **carry it out into practice.***

*Projects are vehicles of the transition from invention to innovation.
(Fagerberg, 2004)*

The „*management by projects*“

*has emerged as general mode of
organising for all forms of enterprises.*
(Turner, 2003)

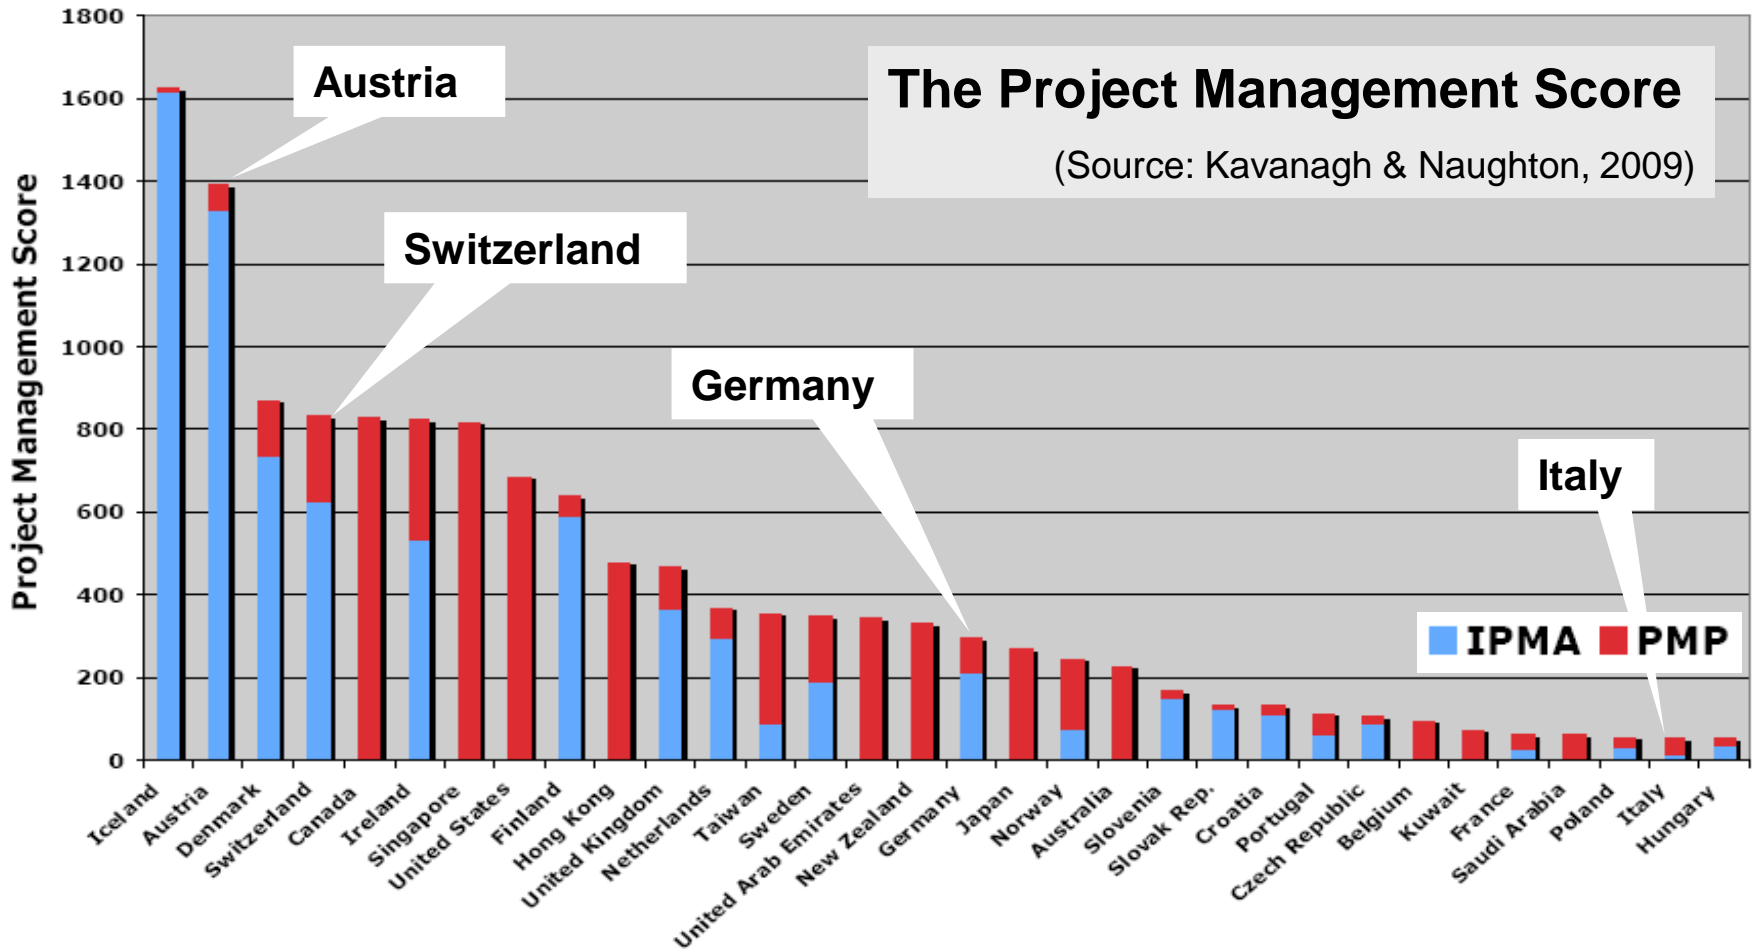

*A **successful**
innovation process
requires effective controlling and
alignment with **project management**.*

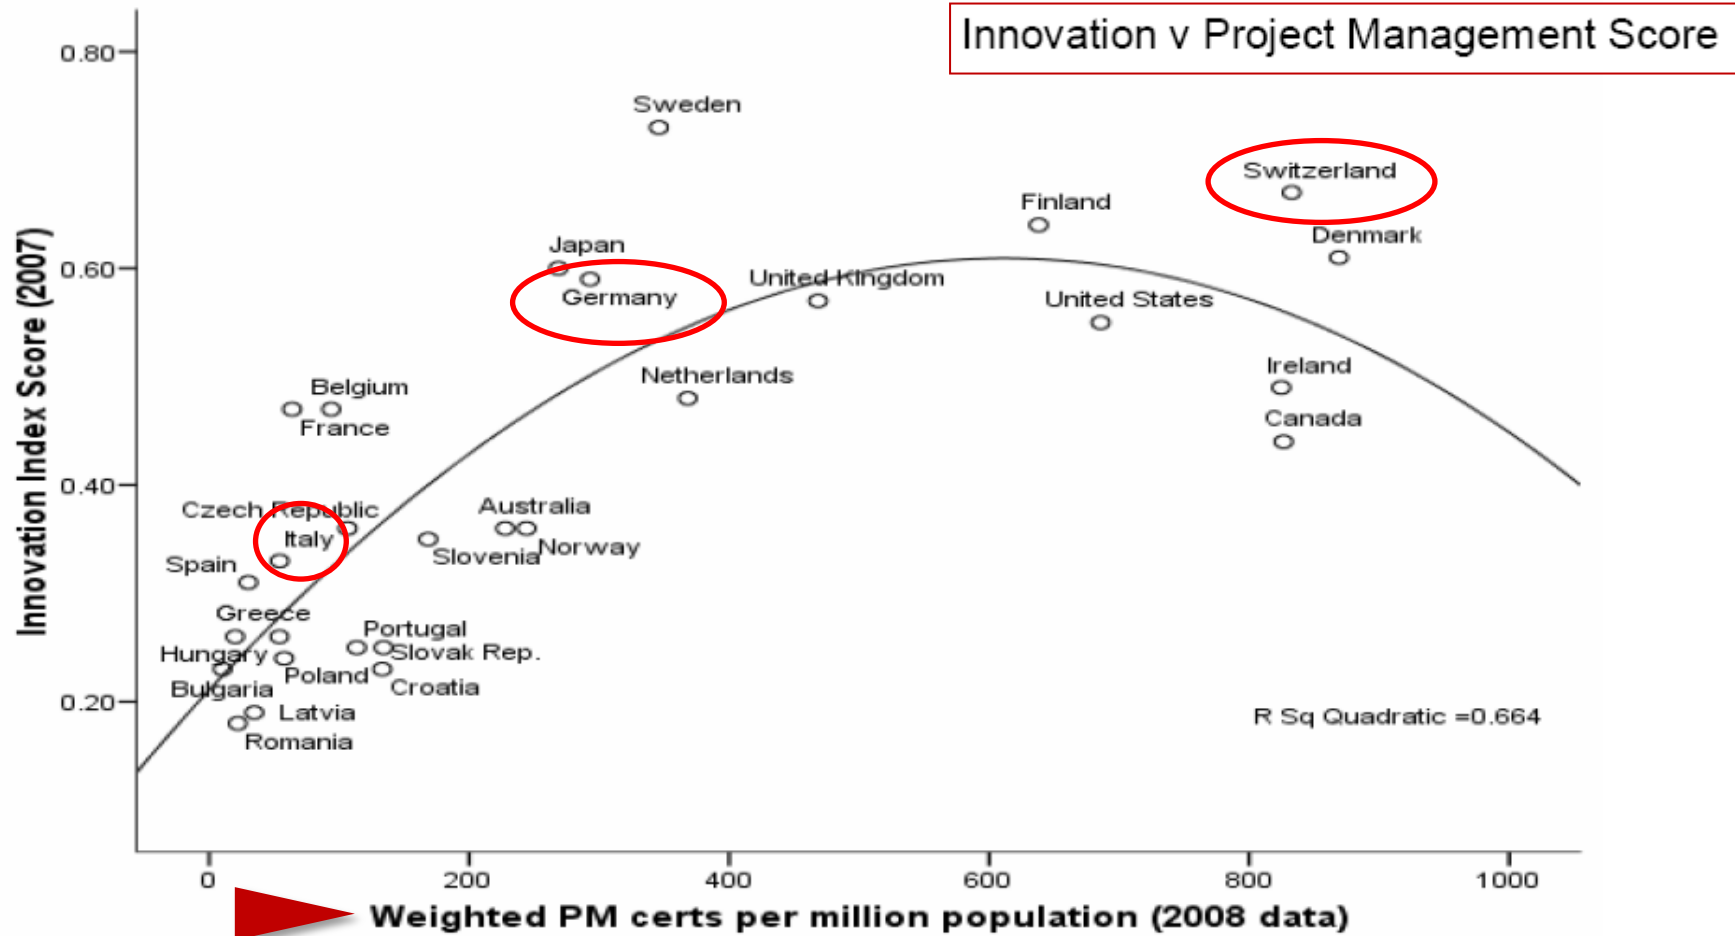

(Amaro dos Santos et al, 2008)

Project Management drives a nations capability of innovation.

*... as can be seen comparing the **Project Management Score Index** of a nation and its **innovation index** from the **European Innovation Scorecard**.
(Kavanagh & Naughton, 2009)*
